

NSF International / Nonfood Compounds Registration Program

January 26, 2001

Refrigeration Technologies
Attn: John Pastorello
2572 Fender Ave # C
Fullerton, CA 92831

RE: Big Blu
P1
Registration No. 119847

Dear John Pastorello,

NSF has processed the application for Registration of **Big Blu** to the *NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (2000)*, which are available at www.nsf.org/usda. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements for appropriate use, ingredient review and labeling verification.

This product is chemically acceptable as a **Micro Leak Detector (P1)** in and around food processing areas, where its use is not intended for direct food contact, nor would it be expected to become a component or adulterant of edible products. Use of this product in food processing or handling facilities requires that all food products and packaging materials be removed or protected prior to product use.

The acceptance for use of this product is the responsibility of the inspector in charge of the food processing/handling facility and of the food processing facility management. The Product Safety Branch upon request will provide technical assistance.

This product is NSF Registered when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF approved product label. The NSF Registration Mark can be downloaded from the NSF website, at http://www.nsf.org/mark/download_marks.html.

Registration of compounds by NSF International is in no way to be construed as an endorsement of the compounds, appropriate selection of use, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF website, at <http://www.nsf.org/usda>. Changes in the formulation of label, without the prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely,

A handwritten signature in black ink that reads 'Lorelle L. Bestervelt' with a stylized flourish at the end.

Lorelle L. Bestervelt, Ph.D.
Vice President of Technical Operations
