

Sentinel Series

Water-Cooled Cooling Systems

Protect your wine investment. Wine Guardian's Sentinel Series units are the **strongest and most energy-efficient** wine cellar cooling systems on the market. They provide **optimal temperature and humidity control** for both commercial and residential cellars with a design that allows for easy installation and service.

Wine Guardian water-cooled systems are ideal for geothermal, cooling tower and lake water applications. Water-cooled systems remove the need to exhaust heat, but require a year-round water supply. Water-cooled units are available in 60Hz and 50Hz configurations. They are also available in our Pro Series.

- 1 Versatile**
Accepts a large range of inlet water temperatures
- 2 Bold**
A stylish and contoured look for modern homes
- 3 Efficient**
Fully insulated cabinet and duct collars for protection in the most demanding environments
- 4 Comprehensive**
Extended range of temperature and humidity control
- 5 Strong**
The most durable wine cooling system on the market
- 6 Accessible**
Innovative multi-panel design with integral fasteners for easy service and maintenance

H₂O Look for this symbol on our site for units that have water-cooled operation.

Sentinel Series

Wine is your passion. *Preserving it is ours.*

Versatile

The water-cooled systems offer **flexible installation**. They accept inlet water temperatures as cold as 45°F (7°C) and as warm as 85°F (29°C). The units also contains high-static pressure fans for extended length ductwork.

Bold

A **sleek and modern look** to compliment any wine cellar design.

Efficient

The ducted split system chassis features up to **three times more insulation** than previous versions. New stronger, double wall insulated duct collars insulate 42% more to help reduce temperature loss and condensation even in the most demanding environments.

Comprehensive

Our cooling systems offer a **wide range of control**, so you can match our units to your specific needs.

- All Wine Temperatures Bundle: For extended wine-cellar temperature ranges (Standard Unit Only).
- Electric Heat Option: Protects wine cellar from low temperature conditions (Pro Unit Only).

Strong

The Sentinel Series is made of the highest UL rated composite material, features an all aluminum chassis, and contains coated coils to ensure **product durability**. It is five times stronger than our previous model. The unit's construction prevents dents and scratches from installation and shipping.

Accessible

Composite multi-panel design with integral captive quarter-turn fasteners allows for **ease of access** and serviceability. Interchangeable duct collars and solid panels can be simply configured during installation. The system also contains easy access water connection points.

Options and Accessories:

- All Wine Temperatures Bundle (Standard Only)
- Electric Heat Option (Pro Only)
- Remote control, monitoring and sensing
- Duct kits and grilles
- Extended warranties
- Humidification

*Not all options are available for all units. Contact a distributor for more information.
