

DYN-O-COAT™

EDGE COATING

Dyn-O-Coat combines the flexibility of sealants, with the quick drying advantage of aerosol to bring you a highly efficient Edge Coating. Simply spray on rips, tears and cut edges to encapsulate fiberglass strands, preventing their entry into the airstream. Dyn-O-Coat dries quickly to a matte black finish to match most perma-coat and matte-faced liners on the market today. It is ideal for use on internally lined ductwork, fiberglass duct wrap and rigid fiberglass duct board.

Sprayable solution to duct buttering liner

Dome-shaped can for easy grip

Fast, convenient, easy application

Quick drying, tack free after curing

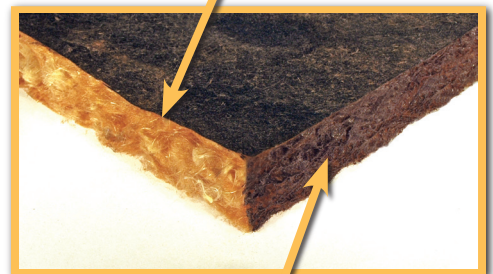

Flexible & Durable

CARB compliant

Can be used on all transverse edges of lined duct in accordance with SMACNA Duct Construction Standards Figure 7-11 Page 7.13.

Encapsulates cut or damaged edges and seams on fiberglass liner

Matte black finish

Packed 12 cans per carton
