

# EARN LEED® CREDITS

WITH DESIGN POLYMERICS SEALANTS, ADHESIVES, MASTICS AND COATINGS

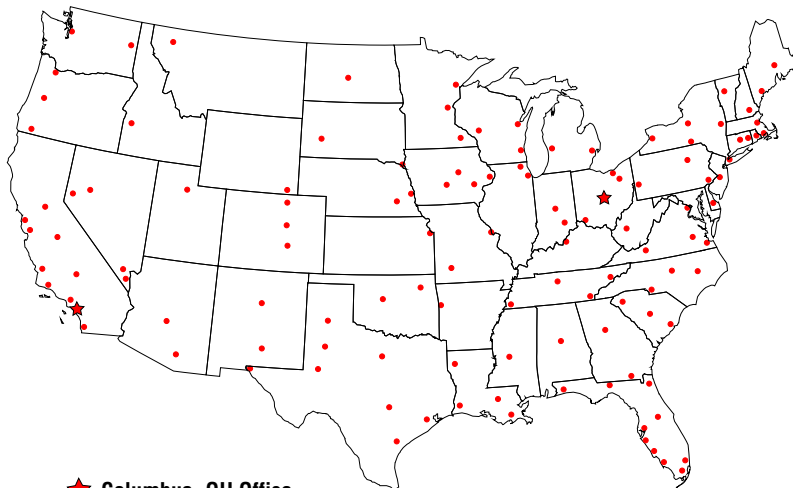

Because LEED has become a nationally accepted benchmark for the design, construction and operation of high performance green buildings, achieving LEED certification for construction projects is becoming increasingly important. LEED certification points are based on the overall design concept and performance of the building. Design Polymerics Water-Based Sealants, Adhesives, Mastics, and Coatings can help you earn LEED credits on your project.

## DESIGN POLYMERICS ELIGIBLE PRODUCTS:

- DP 1010, DP 1015, DP 1020, and DP 1030 Water-Based Duct Sealants
- DP 1040 Butyl Gasket Tape
- DP 2500, DP 2501, and DP 2502 Water-Based Duct Liner Adhesives
- DP 2510, DP 2515, DP 2540, and DP 2545 Water-Based Protective Coatings
- DP 3040 Water-Based Vapor Barrier Mastic Coatings
- DP 3050, DP3050 AF and DP 3060 Water-Based Lagging Adhesive
- DP 5050 and DP 5060 Water-Based Weather Barrier Mastic Coating

Design Polymerics Sealants, Adhesives, Mastics, and Coatings help earn points for the categories listed below.

- ★ Columbus, OH Office
- ★ Santa, CA Manufacturing Plant

## LEED Credit Contributions

Energy & Atmosphere (EA Credit 1) - Optimize Energy Performance: (2-10 points) assists in reducing energy use based on ASHRAE/IESNA Standard 90.1-1999.

Indoor Environmental Quality (IEQ Credit 4.1) - Low-Emitting Materials: Adhesives & Sealants (1 point) Sealants and Adhesives comply with VOC limits of SCAQMD Rule #1168 and/or Green Seal Standard GS-36.

Indoor Environmental Quality (IEQ Credit 4.2) - Low-Emitting Materials: Paints & Coatings (1 point) Listed Mastics and Coatings comply with VOC limits of Green Seal Standard GS-11.

Note: No individual material allows credit points to be achieved within LEED since each category is dependent on the total of all materials and their proportionate relationship to the total dollar cost of all materials.
