

BLACK GOLD

VACUUM PUMP OIL

THE GOLD STANDARD IN VACUUM PUMP CARE

Extend the life of your pump. For use in any vacuum pump, BLACK GOLD is extremely pure and non-detergent. BLACK GOLD is hydro processed through a series of catalytic steps rendering the oil extremely refined, more viscous, and stable. The result is a clear mineral oil which alerts you to contamination sooner as it becomes cloudy or milky.

In extreme temperatures BLACK GOLD is more resistant to contaminants. We recommend that the oil be changed after every evacuation for maximum performance and pump efficiency.

The best test to check for oil contamination is through a vacuum gauge. With a leak-free system, if a vacuum gauge such as the DV-22N is not reading a deep vacuum, the oil is contaminated and should be changed. If the micron gauge pulls down to approximately 50 microns the oil is good.

DV-T1 TANK PUMP OIL CADDY

Change oil between jobs
No more mess and spills
Easy, convenient, and portable
Capacity for five oil changes

| PART NO. | QTY. | DESCRIPTION |
|----------|------|------------------------|
| DVO-1 | 24 | BLACK GOLD pint case |
| DVO-12 | 12 | BLACK GOLD quart case |
| DVO-24 | 6 | BLACK GOLD gallon case |
